Homework 6 Report

Dilara KARAKAŞ

171044010

Q2

Graphs is not clear, so they have been added to the file.

Q3

1. CLASS DIAGRAM

2. PROBLEM DEFINITION

An interface has been created in our library automation system. User firstly states that he / she entered the system as user or admin.

It requests password at admin login. Password is automatically assigned. It is assumed that the guy knows this. After the entered password is accepted, one is asked to choose one of the jobs that the step can do. These jobs are: ADD, REMOVE, UPDATE INFORMATION.

ADD: The program gets the author, name and location of the book to be added to the user, as well as its status (available, un-available, reserved). If there is a book to be added, only a new location and status will be added.

REMOVE: This function prompts the user for the book's author and name that should be deleted. If there is more than one in the book, it just deletes the location. But first he checks the status. If status is reserved, it does not delete. If the author does not have any more books after the book is deleted, it will also delete the author.

UPDATE: This function requests the name, author and location of the book to be updated. You can update the status information of the entered book.

If the user logs in, she or he can search the library. The way of searching is of two types.

SEARCH AUTHOR: If the user wants to search for the author, all the books of the desired author are listed. The book he wants to look is asked and asks for the name of the desired book. The locations of the desired book are listed.

SEARCH BOOK: After entering the title of the book you want to search, the author, the locations and the status of the book are printed.

(Map was kept in the set. Key: Location, Value: Status)

3. TEST CASE

| <u>TEST CASE NAME</u> | <u>ACTION</u> | <u>TEST DATA</u> | <u>EXPEXTED</u> | <u>TEST RESULTS</u> |
|------------------------------|----------------------------------|-------------------------|--|----------------------------|
| ADMIN LOGIN LIBRARY 1 | ENTER ADMIN | admin | System should accepts admin | pass |
| USER LOGIN LIBRARY 1 | ENTER USER | user | Sytem should accepts user | pass |
| ADMIN LOGIN LIBRARY 2 | ENTER PASSWORD | 123 | System should accepts password | pass |
| USER LOGIN LIBRARY 2 | ENTER ACTION | search author | System should accepts action | pass |
| ADMIN LOGIN LIBRARY 2.1 | ENTER ACTION | add | System should accepts action | pass |
| USER LOGIN LIBRARY 2.1.1 | ENTER AUTHOR NAME | xxxxx | System should lists books | pass |
| ADMIN LOGIN LIBRARY 2.1.1 | ENTER AUTHOR NAME, BOOK NAME AND | XXXX | System should adds book | pas |
| USER LOGIN LIBRARY 2.1.2 | ENTER AUTHOR NAME | xxxxx | System should lists locations and status | pass |
| ADMIN LOGIN LIBRARY 2.2 | ENTER ACTION | remove | System should accepts action | pass |
| ADMIN LOGIN LIBRARY 2.2.1 | ENTER AUTHOR NAME, BOOK NAME | xxxxx | If book' status is not reserved, delete; otherwise, not delete | pass |
| ADMIN LOGIN LIBRARY 2.3 | ENTER ACTION | update | System should accepts action | pass |
| ADMIN LOGIN | ENTER BOOK NAME | xxxxx | System should update for status information | pass |

| | | | | |
|--------------------------------|--------------------|-------------|--|------|
| LIBRARY 2.3.1 | | | | |
| USER LOGIN LIBRARY 2 | ENTER ACTION | search book | System should accepts action | pass |
| USER LOGIN LIBRARY 2.1.2 | ENTER BOOK NAME | xxxx | System should lists author name, locations and status | pass |

(Incorrect inputs are also successful.)

4.TEST RESULT

It has been added to the file because it has poor clarity.

```
Dilara-MacBook-Air:src dilarakarakas$ javac Test.java
Dilara-MacBook-Air:src dilarakarakas$ java Test.java
****WELCOME THE NED STARK LIBRARY****
Enter the user, admin or exit
admin
Enter the password (The system identified the password as 123. The admin is assumed to know this.)
123
Enter the you want to do (add)(remove)(update)(exit)
add
Author name:
ahmet ümit
